Installation guide – Essentials collection – N001 Yarns, D Slubs, D Lawn

Read these instructions carefully. Make sure you understand the directions before you start hanging. If in any doubt, call Fromental prior to installation.

We have a list of Fromental approved installers. We will not accept responsibility for hanging faults.

Please ask the client to approve the paper prior to installation. The client should also inspect the installation after 1-3 panel drops have been installed and contact Fromental immediately with any questions / concerns.

IMPORTANT NOTE:

This product is made from natural materials. Colour variation between dye lots is to be expected. Please note the woven threads are not continuous and small knots will appear randomly through out a panel. Please plan carefully where these will fall in the room during installation.

Walls should be lined. (UK; 1000 grade lining paper. USA; Blank stock liner.)

Bench trim, using a knife and straight edge or overlap and double cut. Do not handle the edges after trimming. Trim near the pinstripe.

Non-woven backing paper. Either damp the back of the paper and paste the wall or paste the back of the paper and book it for 2-4 minutes.

Do not get paste or water on the front of the paper. Dab it off ASAP

Paste; Halls Beeline Greentop or Murabond Blacktop.

Technical info and care guidelines

Panel construction:

- Fromental essentials collection N001 Yarns, D Slubs, D Lawn are hand crafted products and as such care needs to be taken when handling.

Caring for your wallpaper:

- For light staining Fromental recommends using a clean damp cloth or baby wipe. A hidden area of wallpaper should be used to test the cleaning method as local conditions may vary.
- The result of any cleaning process is entirely dependent on what the stain is. For this reason, no guarantees can be given.
